

Customer Focus

"Our vision was to start a company with a personal touch that would work hand in hand with suppliers and customers, creating a team like atmosphere.

Today that vision is still the foundation of our continuing success."

**Ed Ellis

Your Full Service Coil & Sheet Metal Fabrication Partner

A Unique Team Approach

Team Manufacturing has been serving the metal stamping needs of the automotive, electronics, medical and industrial markets for nearly 30 years. Why choose **Team**? In a word, **team-work**.

- Your ideas combined with our engineering know how make for an optimum approach
- We strive for a more creative solution – lowering cost, reducing time-to-deliver, and improving quality
- Bottom line — you receive the highest quality finished products possible

Full Service Capabilities

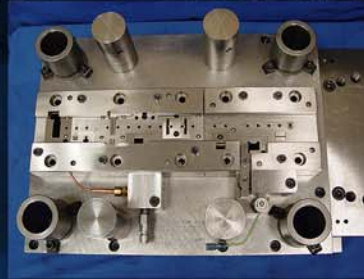

To be successful in today's market, businesses demand product design assistance, rapid turnaround on quotations, tooling and parts, uncompromising quality, and a cost-effective approach.

Team meets this challenge by offering you **innovative engineering, uncompromising quality, world class precision, and extensive manufacturing capabilities.**

Innovative Engineering

Whether you have stamping dies that require modification, or a need to design from concept, we work with you to turn your ideas into finished components that match your exact needs.

- Send us your drawings electronically
- We use the latest CAD/CAM software to ensure accuracy
- Together we'll arrive at the best approach!

Uncompromising Quality

Of course we're ISO 9001:2000 certified, and quality processes are an integral part of everything we do. More importantly, we're driven to providing our customers with a quality product, on time and at exceptional value.

Quality features include:

- An integrated manufacturing quality system
- Full traceability throughout all phases
- Statistical Process Control (SPC)
- PPAP's provided upon customer request
- Defect free process control

World Class Precision

Dedication for making the highest quality tooling

has been a trademark at **Team** from the beginning. Here are just a few reasons why we're in such demand in the medical, telecommunication, electrical and automotive industries:

- Our ability to hold to very tight tolerances
- Flexibility—we modify, or make to specification
- We employ a committed work force that continually exceeds expectations

Extensive Manufacturing Capabilities

With presses on site ranging from 30 to 500 tons, **Team** has capabilities to meet your long and short run needs.

- Support for a variety of materials
- Automated robotic welding
- Welded and mechanical assembly
- Plastisol vinyl dip coatings on metal for non-marring contact
- CNC capabilities
- Production drilling, tapping and riveting of your metal stampings

Make Team Your Partner!
